### Creating

6. Make a quiz of ten fascinating facts about the human body.

7. List, illustrate and describe five different plants which are used for medical purposes. Eg. Aloe Vera
The Human Body

Project Requirements

Your Project must equal 16 points
You must include 1 one point questions, 1 two point questions and 1 three point questions. This equals 6 points. You will need to make up the rest of your points with selections from the project matrix.

Check requirements for each question. Three point questions need to show extra effort. If you work in a small group, effort must be of a suitable standard and quality for that amount of people.

You will need to discuss your selections with your teacher.

Have fun!

ASSESSMENT

These are the expectations for each question

• All questions need to be proof read with typed or legible writing and appropriate pictures or diagrams included.
• We are looking for clear and colourful presentations showing care in design. Projects will be displayed.
• Remember we are looking for you to do your best.
• All resources must be listed in a bibliography.

You will need to research this project not just rely on your own knowledge
